

Nuttall Gear & Delroyd Worm Gear Your Total Drive Source

Nuttall Gear and Delroyd Worm Gear

“Your Total Drive Source” is more than a slogan

Nuttall Gear specializes in providing complete packaged helical and worm gear drive assemblies. We can bring your concept to reality and design a custom drive package to meet your specific application by offering a wide selection of model configurations, housing options, sizes, ratios and accessories. Our Total Drive Source includes:

- Complete mechanical and electrical assemblies
- In-house testing to expertly mount, align and couple your reducer and motor
- Engineering expertise to solve any application problem
- Custom helical gear assemblies to 6,000,000 in lb torque capacity
- Custom worm gear assemblies to 3,400,000 in lb torque capacity
- Machining expertise to manufacture any components for your application
- On-site installation, maintenance and warranty support

You can't get this kind of service from any other company!

Improved Delivery

Delroyd is excited to announce its new order-to-delivery for the following products:

- 2” through 12” Standard Catalog Reducers are now available in 4-7 weeks.
- Worm Gear Mixer Drives (P30 - P40 - P50 - P60 - HP40 - HP50 - HP60 Units) are now available in 3 weeks.

The new delivery commitment is the result of capital investment in new machinery and improved manufacturing processes.

Field Service

The Service Division of Nuttall Gear and Delroyd Worm Gear offers comprehensive and dedicated on-site support designed to keep your rotating machinery in operation. When a gear drive is purchased from us, our commitment to the customer does not stop when the unit leaves our dock. You can rest assured knowing that world-class field service and repairs are only a phone call away. Our extensive experience in gear drive applications, combined with our manufacturing and design capabilities enable us to provide you with a single-source solution for minimizing your downtime and improving your productivity. In addition to our extensive line of products, we can offer cost-effective repair solutions for any manufacturer’s gear drive. As the former Westinghouse Gearing Division, Nuttall Gear is the only authorized repair center for Westinghouse gear drives. We maintain all original drawings and specifications.

Engineering

Delroyd Worm Gear and Nuttall Gear understand each application is different and our custom products are available in almost any configuration with features, ratios, and speeds specialized to your requirements.

Our extensive application and design engineering experience continually produces reliable and cost effective gear drive solutions for many industries globally. Nuttall and Delroyd also have the ability to reverse engineer any manufacturer's gear box or thread forms.

Nuttall Gear has earned a reputation for the design and manufacture of unique, custom engineered gear drives for parallel, right angle or vertical input shaft arrangements. Highlights of our design engineering capabilities include: 3D solid modeling, gear train design and rotor dynamic analysis.

Markets and Applications

Nuttall Gear and Delroyd manufacture vertical and horizontal drives, speed reducers, and speed increasers in cast iron or fabricated steel housings. We provide gearboxes for a wide range of markets and applications, including:

- | | |
|------------------------|---------------------------------|
| Steel mills | Conveyor applications |
| Power generation | Paper/wood processing |
| Textile processing | Mixing/agitation |
| Material handling | Recoilers and uncoilers |
| Bridges and locks | Petrochemical refineries |
| Rail transportation | Mining/mineral processing |
| Oil and gas drill rigs | Water/waste water treatment |
| Cement and aggregate | Food/beverage industries |
| Channel dredging | HVAC compressors |
| Elevators and lifts | Crushing/extruding applications |

Bridge Applications for Gearing

Nuttall Gear specializes in custom engineered and manufactured gearboxes for the lift bridge and lock & dam markets. These gearboxes employ the use of through hardened gearing. The machining, hobbing, grinding and heat treatment processes are all done in-house which helps us provide a more cost effective solution. In addition, our upgraded test floor allows us to load test gearboxes up to 500 horsepower. Testing in-house provides advantages both from a turnaround time and cost perspective and every gearbox manufactured at Nuttall Gear is tested at our facility in Niagara Falls, NY before it ships.
